

# Footscray Hospital Construction

## Daily Construction Site Report

PROJECT	REPORT DATE	REPORT ID	STATUS
<b>URL-Based Email Template Test</b>	<b>11/12/2025</b>	<b>a4db5b70</b>	<b>PROCESSING</b>

### Works Summary

#### Email template testing with URL-based images

Administrative/system testing of daily report email template using image URLs instead of base64. No physical construction works undertaken.

#### Key Activities:

- Validated client logo accessibility via URL
- Tested webhook payload structure and data mapping
- Verified report schema population and man-hour calculation
- Confirmed no plant/machinery usage and no site disruptions

### Workforce

<b>5</b>	<b>8</b>	<b>40</b>
Total Workers	Total Hours	Man Hours

## Works Performed

---

Testing email template with image URLs instead of base64. Client logo should be accessible via URL.

## Materials Used

---

MATERIAL	QUANTITY	UNIT
Testing webhook payload structure	N/A	N/A

---

## Safety & Incidents

---

### Safety Observations:

No incidents reported; office-based testing activity.

## Next Day Plan

---

- Conduct end-to-end email dispatch test with hosted client logo URLs
- Integrate automated weather data capture for site conditions per reporting requirements
- Capture and attach on-site photos of any field activities for evidence and compliance with VicRoads documentation expectations
- Review and confirm template rendering across email clients and devices
