

# Footscray Hospital Construction

## Daily Construction Site Report

PROJECT	REPORT DATE	REPORT ID	STATUS
<b>Webhook Integration Test Project</b>	<b>11/12/2025</b>	<b>c03bb024</b>	<b>PROCESSING</b>

### Works Summary

#### Automation Workflow Testing and Site Readiness

Testing automated webhook POST to n8n for email distribution system. This validates the complete flow from form submission through AI analysis, PDF generation, and webhook notification.

#### Key Activities:

- Executed webhook POST to n8n and confirmed receipt
- Validated AI analysis output and PDF generation
- Verified email distribution and notification triggers
- Monitored system logs for errors and latency
- Completed plant readiness checks (pre-starts) for excavator and concrete mixer

### Workforce

<b>5</b>	<b>8</b>	<b>40</b>
Total Workers	Total Hours	Man Hours

## Works Performed

---

Testing automated webhook POST to n8n for email distribution system. This validates the complete flow from form submission through AI analysis, PDF generation, and webhook notification.

## Materials Used

---

MATERIAL	QUANTITY	UNIT
Concrete	unspecified	N/A
Steel rebar	unspecified	N/A

## Plant & Equipment

---

- Excavator
- Concrete mixer

## Safety & Incidents

---

### Safety Observations:

No incidents reported. Site inductions current; SWMS reviewed; plant pre-starts completed; exclusion zones maintained.

## Next Day Plan

---

- Conduct user acceptance testing (UAT) for webhook-to-email workflow with multiple recipients
- Perform load testing and monitor n8n workflow performance and error handling
- Finalize PDF template formatting and distribution rules
- Prepare contingency notifications and logging per project QA requirements
- If physical works proceed: verify reinforcement inspection and concrete delivery bookings in accordance with VicRoads requirements prior to any pour
